

1st Asian Workshop on Molecular Spectroscopy

May 20-21 2017

Kyoto University, Japan

Welcome to Kyoto, Enjoy molecular spectroscopy.

This is to announce the 1st Asian Workshop on Molecular Spectroscopy. We, the organizing committee, warmly welcome young scientists, graduate students, post-doctoral fellows and all of our colleagues to join us in Kyoto to present oral talks and communicate your exciting research findings to each other. The main focus of this workshop will be on high-resolution molecular spectroscopy, and all experimental and theoretical works are welcome. Molecular spectroscopy is a powerful tool to deeply understand the structure and properties of molecules in Chemistry, Physics and the Universe in which we live. The purpose of this meeting is to encourage general discussion and networking and to explore the topics from the contributed oral talks on all your favorite molecules.

We look forward to seeing you in Kyoto, May 20-21, 2017. Please visit the URL link below for more details about this meeting as well as the 17th Symposium on Molecular Spectroscopy, held prior to this workshop mostly within the framework of the Japanese language, that you also are welcome to attend.
